BUFFALO WOODEN FLOOD DOORS

We are delighted to introduce our bespoke, wooden flood doors. This revolutionary product is the first on the UK market and allows you to have the best in flood defence without compromising style.

- We use a variety of durable hardwoods such as Sapele to meet our customer requirements, these have greater weather resistance than softwoods
- We treat and finish the doors with our own treatments that give a greater weather resistance and protection to the wood. Our standard Buffalo range comes in nine opaque finishes
- Our doors can have an 'emergency egress' installed in the top half of the door to enable the occupant to get out of the property in the event of high flood water
- Our doors come with specific gearing that provides the force needed to create a watertight seal around the door
- We can design structures for bars and shop fronts that can be made flood proof to accommodate our flood doors and windows
- Buffalo offer French (double) doors in our range. The doors can have full height clear glass, and a semi-permanent removable centre mullion
- Our doors are 100% manufactured in the UK giving complete control over the design and quality of the product
- **Factory tested to PAS 1188 which represent typical conditions that might be experienced during a flood in the UK. This industry standard tests the effectiveness of protection to 600mm high**

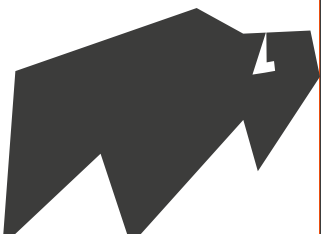

CAN BE USED TO PROTECT:

- Listed buildings
- Shop fronts
- Private homes

PRODUCT GUARANTEE:

5 Years (subject to annual servicing)

TO FIGHT THE FLOOD, INSTALL THE BUFFALO.
