

WORLD'S FIRST

110mm / 4"
UNIVERSAL FIT
WATER AND RODENT
NON-RETURN VALVE

Unique shape allows the valve to open on bent inlets

Integrated stainless steel plate making the valve rodent resistant

Lockable handle for maintenance in the line or chamber

Fits clay, plastic and concrete 110mm/4" pipes

Stops the backflow of water and debris

Deters vermin, snakes and insects travelling up the pipe

Rubber seal reduces noxious fumes entering properties

Vermin

Snakes

Insects

Backflow

Fumes

The new WAR Non Return Valve is the first of its kind. The unique shape and design allows it to open clear of sewer walls on both straight and bent inlets making it the first Universal Non Return Valve available for all 110mm/4" pipes.

WORLD'S FIRST

110mm / 4"
UNIVERSAL FIT
WATER AND RODENT
NON-RETURN VALVE

The WAR Non Return Valve is easy to fit and operates on 110mm/4" straight or bent inspection chamber pipes both clay and plastic.

This valve is a universal product due to its unique design, with a shaped, stainless steel reinforced flap that has an integrated mechanism that allows it to be locked watertight. This revolutionary product has been designed and manufactured in Yorkshire, UK and offers protection from flooding, rodents, insects and noxious fumes.
